# BOUNTY FARMS MANAGES FARM TO FORK VIA NAVFARM

**About Bounty Farms:** Bounty Farm Ltd. is a Poultry producer. Being the largest poultry producer in Guyana, they also manage retail meat.

Bounty hatch their own chicks. Rear their birds on farms they own as well as sub-contracted farms. Slaughter and package their poultry and distribute packaged poultry products to their customers.

Apart from this they also manufacture their own feed mix for their farms as well for sale to other poultry producers.

**Why They Choose NAVFarm:** Bounty Farms identified that being a big market that are already self-sufficient with chicken, export from Guyana shall be tough. In order to fulfill the demand while ensuring quality is delivered, Mr. Patrick realized importance of standardizing processes within the organization.

Hence they decided to go onto NAVFarm to provide better access to Farm Data, Accurate FCR, Proper Daily Inventory, Real time Calculation of the yield of the Feed Plant etc. along with Integrated Finance and Supply Chain. Through NAVFarm Bounty Farm improved data capture and Standardization for the major Processes.

## Challenges

- Standardization of Process
- Control on Quality
- Flock Traceability
- Inventory Movement
- Calculating Egg Cost
- Identifying P&L Farm-wise
- Feed Conversion Ratio (FCR)
- Maintain Farmer History
- Managing Shelf Life
- Integration with Weighbridge

## Advantage

- Batch Wise Inventory Movements.
- Egg Costing on Single Click
- Actual Vs. Standard Analysis
- Improved Stock Valuations
- Better Planning & Forecasting
- Single Source of Truth
- Organized Inventory System
- Analysis like Ageing, Cash Flow etc
- Improved Sales Distribution
- Auto Reconciliations
